## Bermuda Athletic Field Program

This program focuses on setting a baseline fertility program with synthetic, granular fertilizer and supplementing with foliar applications. As far as insects and disease, we are primarily focused on defending against grubs, webworms, brown patch, and dollar spot with this program.

**Sunniland 16-0-8** 10-12 Pounds per 1,000 Sq. Ft. / 300-450 Pounds per Acre

Sunniland's 16-0-8 offers a well-balanced NPK fertilizer with benefits of having some slow release in it to feed the field over time.

**Miller's Iron Chelate DP** 1 Pound per Acre

Miller's Iron Chelate DP is a 13.2% Iron DTPA chelate that is fantastic as a foliar application monthly or bi-monthly for green-up.

**ImidaPro 2SC** 1.5 Pints per Acre

ImidaPro 2SC is a great systemic insecticide that should be applied prior to hatch of grubs to give control of grubs and mole crickets throughout summer.

## Sharda's Leave 30 WDG 2-4 Ounces per Acre

Leave 30 WDG gives fantastic knockdown control of sod webworms when they become an issue. Re-application may be made 10 days after initial application.

## Rightline Azox 2SC 17.4-30.5 Ounces per Acre

Azox 2SC will provide excellent control of various diseases such as pythium blight, brown patch, take-all patch, and more. Azox 2SC should be applied prior to noticing any damage of listed diseases.
