“Bring Back” Spray

In turf, sometimes your grass just is not responding, and you need something to bring it back. Our “Bring Back” spray has you covered. A combination of available NPK, amino acids, and beneficial bacteria, this mix will have your turf responding in no time.

Miller’s Biovive 3-0-0 **Foliar 1 OZ per GL or 2 PTS per acre**

When your turf is experiencing a number of stresses, or isn’t looking as healthy as it should, then a shot of Biovive will help. Biovive includes a number of key amino acids for recovery, as well as enhancing the turf’s tolerance for abiotic stress.

Millerplex 3-3-3 **Foliar spray @ 1 OZ per GL or 4-32 OZ per acre**

Millerplex provides the NPK necessary for growth, as well some sea kelp for stronger rooting. This works excellent in combination with Biovive to reduce abiotic stress, and improve nutritional conditions and uptake.

Armory SP **Foliar spray @ 1-8 OZ per 50-100 GL or 1 TSP per GL**

A beneficial combination of bacillus and streptomyces, Armory SP will promote vigor, and growth. Along with this, Armory will increase nutrient cycling, and make key nutrients like iron more available, essentially creating a much stronger stand of turf.
