## Earthstrong's Quality Turf

When growing and managing turf, of all types, you want to get the most out of your Nitrogen, because this is the element that makes the grass grow, and something you use often throughout the season. Use this program to help balance your turf program, and increase your Nitrogen efficiency.

### Earthstrong Cove-N 1 GL per 100 units of N

Cove-N protects all Nitrogen from all forms of loss like leaching and volatilization. Cove-N will allow you to get more out of the Nitrogen that you invested in. Use Cove-N with every application of Nitrogen.

### Augusta Max 27-0-0 Foliar spray @ 16 OZ per acre

Augusta Max will allow you to achieve greener grass, while also minimizing clippings. This unique blend of slow-release Nitrogen will last 6-8 weeks. Use Augusta Max on a monthly basis for best results.

### Earthstrong IronMan Foliar spray @ 8 OZ per acre

IronMan is uniquely formulated with Soil to Cell Technology™, which allows the nutrient and chelating agent to be utilized by the cell without the need for energy expenditures. Formulated with advanced amino/carbohydrate technology, it is protected from tie-up in the soil, making IronMan at least 4X more efficient compared to the industry standard.

## Earthstrong's Quality Turf

### Earthstrong Harbor K 32 OZ per acre

Potassium improves the movement of water, nutrients, and carbohydrates in plant tissue. HARBOR®-K is a fully protected form of potassium, prohibiting potassium absorption to the soil aggregate, making it readily available to the plant. SOLUMETRIX soil tests have shown that up to 90% of fields would benefit from an application of HARBOR-K which can replace up to 15 units of pre-plant K<sub>2</sub>O applied to the soil.
