## Miller's **Ultimate** Turf Feed

As a distributor of Miller products for over 40 years, we are incredibly confident in their efficacy and results. Below you will find Miller products that are fantastic for turf, whether it's lawn & landscape, Golf, or Sod Farming. Use this program as a guide to achieve resilient, healthy, lush turf.

### Microplex **Foliar @ 1 – 1.5 LBS per acre**

Use Microplex in the early spring for green-up, and to supply the turf with the essential minor elements it needs to thrive.

### Greenstim 2-8-14 **Foliar spray @ 2-6 PTS per acre**

Use Greenstim in late spring, heading into summer for the anticipation of heat and moisture stress. Greenstim will also supply the plant with a very efficient form of energy that it can use to deal with abiotic stress, and stimulate growth.

### ZMC Express **Foliar spray ½ – 1 LB per acre**

Apply ZMC Express mid-summer to help deal with micronutrient shortages such as Mg, Mn, and Fe. Also, the Calcium in ZMC Express will help strengthen tissues.

## Miller's **Ultimate** Turf Feed

### Millerplex 3-3-3 + Vapor Gard

Millerplex foliar @ 4-32 OZ per acre  
Vapor Gard @ 1 GL per acre

Use this combo to support root growth, as well as reduce water stress during the wet months of Summer. Vapor Gard will help the turf improve water availability, as well as maximize irrigation efficiency.

### CALFA

Foliar spray @ 4-10 OZ per acre  
8-32 OZ per acre through drip lines

Use CALFA to help the turf recover from summer stresses, as well as help make all nutrients more available to recover.

### Miller's 20-5-5 Foliar spray @ 5-10 LBS per acre

Apply 20-5-5 throughout the year, specifically fall, spring, and summer to provide appropriate ratio of NPK to the turf. This can be mixed with CALFA as well (see above)
