

MoNi 0-0-1

355 E South St Collierville, TN 38017
CS@earthstrong.net 901.853.2898

DESCRIPTION: MoNi is a soil and foliar applied nutrient solution designed to resolve nutrient deficiencies on fruit and nut orchards, vineyards, vegetable crops, and all field and row crops.

SOIL APPLICATION: Best results will be obtained when applications are watered in. Inject with your drip or sprinkler irrigation. May be broadcast sprayed prior to sprinkler irrigation. Use the higher rates with flood irrigation. May also be knifed into the soil prior to an irrigation.

FOLIAR APPLICATION: Best results will be obtained when applications are applied early morning or late evening, when ambient temperatures are lower and when the stomata are open.

RATES - FOLIAR APPLICATIONS

Up to 24 fl oz/acre. Repeat as needed.

RATES - SOIL APPLICATIONS

Up to 32 fl oz/acre. Repeat as needed.

COMPATIBILITY: MoNi is compatible with most agricultural soil products. Adding additional water to tank mixes will always improve compatibility. Always establish compatibility using the standard quart jar method prior to tank mixing.

WARRANTY AND CONDITIONS OF SALE: Manufacturer warrants that this material conforms to the chemical description hereon and is reasonably fit for use as directed. No other warranty is made, either expressed or implied. Buyer and user, therefore, acknowledge and assume all risk and liability resulting from handling, storage, and use of this material.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.html>

EMERGENCY RESPONSE: In the event of a medical emergency or in the event of a leak or fire, please call INFOTRAC at 1-800-535-5053, 24/7/365.

GUARANTEED ANALYSIS

Soluble Potash (K ₂ O).....	1.00%
Sulfur (S).....	0.50%
Cobalt (Co).....	0.50%
Molybdenum (Mo).....	2.50%
Nickel (Ni).....	0.20%

Derived from potassium hydroxide, cobalt sulfate, sodium molybdate and nickel sulfate.

DANGER! Causes skin irritation; Causes serious eye damage;- May cause allergy or asthma symptoms or breathing difficulties if inhaled; Suspected of causing genetic defects; May cause cancer by inhalation; May damage fertility; Suspected of damaging the unborn child.
