PGR Starter Pack

Thinking about using a PGR, and don't know where to start? Use this plan to limit vertical growth, and ensure green-up as well. The results will speak for themselves!

Primo Maxx OR Groom PGR 0.25 Oz per 1,000 Sq. Ft. for Bermuda

Both options use the active ingredient Trinexapac-ethyl. Use either product to promote denser turf, and less mowing (vertical growth).

Iron Chelate DP 0.33 Oz per 1,000 Sq. Ft.

Use this chelated iron source along with your PGR of choice to help the turfgrass recover, and green-up.
